Q12. What was good about the TA?

1. Easy to reach and ask questions.
2. Provided more detailed tutorial notes
3. She has her own extra notes for the tutorials.
4. She has her own ppt which have a better illustration to us
5. The TA is considerate. She adjusts the progress of tutorials according to the progress of the lectures. She also provided information in addition to the course-provided standard notes to better help students.
6. This TA is the best. She explains all the concepts so clearly that you don't need to attend the lectures. Her tutorials were very helpful when I prepared for midterm exam.
7. Very kind and helpful!

Q13. How might the TA improve?

1. no

^ Explanatory notes on adjusted percentage, mean and SD (collectively referred to as "adjusted statistics" below):

1. Adjusted statistics are calculated to provide a reference with extreme responses being excluded.
2. If a survey recorded 3 or more responses, the top 1.5% AND bottom 1.5% responses will be discarded. The number of discarded response(s) of each end is rounded UP to the nearest integer. The resultant data set will then be used to calculate adjusted statistics in this report.
3. Adjusted statistics will be provided up to course level if and only if they meet the following conditions:

Level of adjusted statistics	Conditions
Survey level	The survey receives 3 or more responses.
Section level	(1) All surveys receive 3 or more responses; AND (2) This section is taught by One instructor, teaching support staff, or teaching assistant.
Course level	(1) All surveys receive 3 or more responses; AND (2) This course is taught by One instructor, teaching support staff, or teaching assistant.

If no adjusted statistics is provided, it will be marked as "-" in this report.
